

## A crowdfunding platform for the cryptocurrency age

If you are an investor figuring things out on your own among so many available crowdfunding platforms and Initial Coin Offerings (ICOs), we offer you the support of an army of highest-quality Chartered Financial Analysts (CFAs), as if you were a big investment bank.

### **Our offer**

After the surge of popularity of ICOs, unscrupulous founders are taking advantage of some lack of regulation and disappearing with the raised funds.

To help minimise this issue, we offer our **DDEcosystem**, a new, multilingual, professional-grade platform that dramatically helps both nascent and mature, mid-size businesses to raise financing, while uniting creators and backers of campaigns to form an engaged and well-informed community.

Our platform includes two main features:

- Backed by the worldwide CFA community, it provides professional risk management tools and significant screening on the projects submitted, only accepting the best ones on our platform for our registered users.
- Built on Ethereum and funded by cryptocurrencies, it offers the transparency, resilience and distributive element of smart contracts technology, allowing registered users to launch their automated TGEs, pre-TGEs, crowd investing, and crowdfunding campaigns in a process as simple as possible.

We aim to open to the masses the world of private equity industry, which manages assets of circa US\$ 3.2 trillion, by means of our TGE (Token Generating Event) vehicle, which we see as the future of the ICO.

In our SPAC 2.0 model, we are raising 10% or the equivalent of USD 10 million for human capital first and having to complete the residual 90% (USD 90 million) in accretive deals, on a monthly, quarterly, or semi-annual and project-by-project basis to earn a 20% interest in DDTokens. At the same time, the investors are free to use their capital for other opportunities until their funds are genuinely needed, instead of tying it up for three years.

Besides, backers support funding campaigns with their hard-earned money will get not only the usual reward pledges and eventually tokens issued by the fundraiser but also our real, valuable, exchangeable DDTokens, ensuring them against not only the failure of the project but also inexecutable plans.

# Issue of DDTokens (DT)

The initial issue of DDTokens (ERC20-compliant, symbol DT) is limited to 29,000,000 DT during our pre-TGE and TGE campaigns for the token equivalent of circa USD 10 million. The starting rate for expansions after the release of DT on major exchanges will be fixed at the level of 1 ETH = 1552 DT (1 DT = 0.0006 ETH).

<b>Start of preTGE:</b> 26 Jun 2018 <b>Duration:</b> 90 days <b>Cap:</b> \$ 3.3 million <b>Token price:</b> 0.0005 ETH* <small>*Subject to a 6-month lock-up</small>	<b>Start of TGE:</b> 30 Sep 2018 <b>Duration:</b> 90 days <b>Cap:</b> \$ 6.7 million <b>Token price:</b> 0.00072 ETH	<b>Release:</b> 29 Dec 2018 <b>Token price:</b> 0.0009 ETH
